CBT College will prepare you for the following certifications:

**A+ Certification**
This Certification is the industry standard for computer support technicians. The international, vendor-neutral certification proves competence in areas such as installation, preventative maintenance, networking, security and troubleshooting.

**NETWORK+**
The CompTIA Network+ certification is the sign of a competent networking professional. It is an international, vendor-neutral certification that proves a technician’s competency in managing, maintaining, troubleshooting, installing and configuring basic network infrastructure.

**MCP**
The Microsoft Certified Professional (MCP) credential is for professionals who have the skills to successfully implement a Microsoft product or technology as part of a business solution in an organization.

**MCSA**
A Microsoft Certified Systems Administrator (MCSA) certification enables IT professionals to demonstrate their ability to administer network and systems environments that are based on the Windows operating systems. Specializations include the MCSA: Messaging and the MCSA: Security.

**CISCO (CCNA)**
CCNA validates the ability to install, configure, operate, and troubleshoot medium-size route and switched networks, including implementation and verification of connections to remote sites in a WAN. CCNA curriculum includes basic mitigation of security threats, introduction to wireless networking concepts and terminology, and performance-based skills.

Get started in a rewarding & exciting career in IT
-AS in Networking Administration
PROGRAM SHOWCASE

Get started in a rewarding and exciting career in computer science with an Associate Degree in Networking Administration. You will receive the hands-on training on state of the art computer labs to prepare you for the field of network systems administration, and to gain the technical skills necessary to troubleshoot and maintain computer hardware and its business software applications. Students will learn to administer, troubleshoot, and support network systems in a Microsoft Windows environment using Microsoft and Cisco operating systems.

INDUSTRY APPLICATION

In today’s society, we have become completely dependent on computers. From communications to entertainment, to healthcare, to transportation, every industry is in need of a computer network and IT infrastructure to operate. Students who earn an Associate Degree in Network Administration from CBT College will be eligible to apply for jobs as a computer support specialist, network administrator, help-desk analyst, database manager, Internet manager, among others.

“Receive Hands-On Training with state of the art technology.”

JOB OUTLOOK

According to the Bureau of Labor Statistics (BLS), in 2004 there were nearly 800,000 people working as computer support specialists and systems/network administrators, with more growth projected. Network administrators, especially, are going to be in demand, with an expected employment growth exceeding 26 percent by 2014.

Certification Goals:

Why get certified? By earning a certification credential, you can prove your expertise in using the latest office programs and legacy operating systems. Certifications will help you standout in today’s competitive job market, broaden your employment opportunities by displaying your advanced skills, which result in higher earning potential. Certification can also lead to increased job satisfaction. Research indicates that certified individuals have increased competence, productivity, and credibility with their employers, co-workers, and clients.

For employers, the certification program provides skill-verification tools that not only help assess a person’s skills in using the latest business programs but also the ability to quickly complete on-the-job tasks across multiple applications.
